Medical Laboratory Scientist

What They Do
Perform complex medical laboratory tests for diagnosis, treatment, and prevention of disease. May train or supervise staff.

Is This For You?

Work Interests are described in the following categories (compatible with Holland’s Model). People who tend to succeed in this career are:

Investigative – involve working with ideas, and require an extensive amount of thinking. Includes searching for facts and figuring out problems mentally.

Realistic - Enjoy work activities that involve practical, hands-on problems and solutions.

Conventional - Enjoy following a set of procedures and routines with a clear line of authority to follow. May include working with data and details more than ideas.

Work Values are aspects of work that are satisfying to you. The following work values are generally associated with this career:

Support - Offer supportive management that stands behind employees.

Independence – Allow employees to work on their own and make decisions.

Achievement – Results oriented occupation that allows employees to use their strongest abilities, giving them a feeling of accomplishment.

Abilities reflect a person’s aptitude to acquire skills and knowledge. The following abilities are important for success in the career:

- Near Vision
- Written Comprehension
- Inductive Reasoning
- Oral Comprehension
- Deductive Reasoning
- Information Ordering
