What They Do
Investigate the growth, structure, development, and other characteristics of microscopic organisms, such as bacteria, algae, or fungi. Includes medical microbiologists who study the relationship between organisms and disease or the effects of antibiotics on microorganisms.

Is This For You?
Work Interests are described in the following categories (compatible with Holland’s Model). People who tend to succeed in this career are:

**Realistic** - Enjoy work activities that involve practical, hands-on problems and solutions.

**Investigative** - Interested in science and logic. They like to analyze, evaluate, and solve problems, and enjoy learning and understanding the causes of events.

Work Values are aspects of work that are satisfying to you. The following work values are generally associated with this career:

**Recognition** – Offer advancement, potential for leadership, and may be considered prestigious.

**Achievement** – Results oriented occupation that allows employees to use their strongest abilities, giving them a feeling of accomplishment.

**Independence** – Allow employees to work on their own and make decisions.

Abilities reflect a person’s aptitude to acquire skills and knowledge. The following abilities are important for success in the career:

- Inductive Reasoning
- Written Comprehension
- Category Flexibility
- Deductive Reasoning
- Information Ordering
- Problem Sensitivity
Skills You Need

- Science – Using scientific rules and methods to solve problems
- Reading Comprehension – Understanding written sentences and paragraphs in work related documents
- Writing – Communicating effectively in writing as appropriate for the needs of the audience
- Active Listening – Giving full attention to what other people are saying, taking time to understand the points being made, asking questions as appropriate, and not interrupting at inappropriate times
- Critical Thinking – Using logic and reasoning to identify the strengths and weaknesses of alternative solutions, conclusions or approaches to problems

Education & Training

Microbiologists need a bachelor’s degree in microbiology, biology, or agricultural science.

Where They Work

The South Dakota Industries which employ the largest number of microbiologists are:

- State Government Educational Services
- State Government
- Federal Government
- Architectural and Engineering Services
- Medical Equipment and Supplies Manufacturing
