

Mr. Clean and Tidy

Professions: A variety of health professions.

Grade Level: K-2

All HOTT lesson plans are designed with the purpose of increasing students' awareness of the variety of health careers that are available to them. If possible, invite the corresponding health professional into your classroom to discuss his/her occupation. If this is not an option, use the attached sheet(s) to share this/these career(s) with your students.

Purpose: To inform students on proper hygiene and staying clean.

Materials needed: Template (provided on the following page) and hygiene questions

Duration: 1 Hour

Instructions:

- Split up the class into groups of about 4 and have them come up with a team name. This could also be done individually.
- Give each group a copy of the bag and the items attached to this lesson. They will need to cut out the sanitation items and color them.
- Ask the class a hygiene question and the first group to raise their hands gets to answer the question. If they get it right they get to add a sanitation item to the bag, but if they get it wrong, they don't get to add an item to the bag. The first team to fill their bag wins. 12 items will fill the bag.
- Sample questions and template are included.
