What They Do
Assess individual or family risk for a variety of inherited conditions, such as genetic disorders and birth defects. Provide information to other healthcare providers or to individuals and families concerned with the risk of inherited conditions. Advise individuals and families to support informed decision making and coping methods for those at risk. May help conduct research related to genetic conditions or genetic counseling.

Is This For You?
Work Interests are described in the following categories (compatible with Holland’s Model). People who tend to succeed in this career are:

Investigative – Interested in science and logic. They like to analyze, evaluate, and solve problems, and enjoy learning and understanding the causes of events.

Social – Like to work with other people. They enjoy teaching, helping, and curing people. They are good with words.

Work Values are aspects of work that are satisfying to you. The following work values are generally associated with this career:

Achievement – Results oriented occupation that allows employees to use their strongest abilities, giving them a feeling of accomplishment.

Relationships – Allow employees to provide service to others and work with co-workers in a friendly non-competitive environment.

Recognition – Offer advancement, potential for leadership, and may be considered prestigious.

Abilities reflect a person’s aptitude to acquire skills and knowledge. The following abilities are important for success in the career:

- Written Comprehension
- Deductive Reasoning
- Inductive Reasoning
Skills You Need

• Reading Comprehension – Understanding written sentences and paragraphs in work related documents.
• Active Listening – Giving full attention to what other people are saying, taking time to understand the points being made, asking questions as appropriate, and not interrupting at inappropriate times.
• Complex Problem Solving – Identifying complex problems and reviewing related information to develop and evaluate options and implement solutions.
• Active Learning – Understanding the implications of new information for both current and future problem-solving and decision-making.
